LEARNERSMOT2 MOTIVATING ADULT LEARNERS

SECOND NEWSLETTER

LearnersMot2

In this issue

- "Deep in Literacy. A Blended Course on Functional Literacy and Education for Bettering Basic Skills"
- Development of the web-application for low-educated and low-skilled adult learners
- Project meetings and next activities

"Deep in Literacy. A Blended Course on Functional Literacy and Education for Bettering Basic Skills"

We are happy to announce that the modular course "Deep in Literacy" is now available on our project website: <https://learnersmot2.eu/>.

The course is to train adult educators to use and be able to create methods to help their adult learners:

- Develop basic skills needed in the workplace and daily life by introducing contextual and collaborative learning (teamwork skills)
- Understand the nature and process of socialisation/technological education
- Introduce aspects of calculation applied to daily life
- Improve students' learning skills, motivate them to enroll and what is more, remain in education.

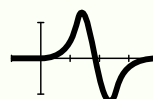

It consists of 6 Modules, quizzes and best practices.

Development of the web-application for low-educated and low-skilled adult learners

Partners are now very busy with developing other project results. One of them is a web-application designed to reinforce the basic knowledge of low-skills and low-qualified adults. The app uses thinking and game mechanics in a non-game related context to enhance user's engagement and learning. These games/exercises aim to improve the following skills of adult learners:

- reading and writing
- spelling
- mathematics
- problem-solving
- communication.

Stay tuned! The application will be soon ready on our project website!

Project meetings and next activities

Partners arrived in Nicosia, Cyprus!

For the first time, project partners met personally during the transnational project meeting in Nicosia, hosted by EUROSUCCESS. They had a chance to decide upon the next activities and get to know each other better.

Soon, partners and experts will take part in the training in Ljubljana, Slovenia, where they will be conducting sessions presenting the modules from the web-application they have developed in order to fine-tune the project result before releasing it.
